36 years old

OVERVIEW

I'm a full stack developer working for more than ten years with web technologies, which I have used to create intranet applications such as CRM or ERP and applications for the end customer.

I've worked for more than seven years with Angular and more than five years with Laravel in the development of web and mobile applications (Ionic).

I currently have two applications designed and created in the backend and frontend by me in Google PlayStore: Tagger Smart Resident and ClickBox PDV.

EDUCATION

2001 - 2004

Computer Systems Tech

CETis #15

2004 - 2010

Communication Sciences

Universidad Veracruzana

EXPERIENCE

Tech Lead

ClickBox Mobile, 2012 - 2022

I worked for 10 years leading the different groups of developers who were in charge of creating internal applications and the mobile application for end customers, ClickBox PDV, which was used to sell Electronic Airtime. Stack: Frontend with Angular 6 and Ionic 3; and Backend with CodeIgniter 3 and Laravel 6

Tech Lead

WobiSoft, 2014 - present

I designed and developed applications for the Instituto Veracruzano del Deporte, specifically an application for the management of meals for the athletes of the 2014 National Youth Olympics. In addition, I am still involved in the development of Tagger Smart Resident and Admin, applications for the control of intelligent access and resource control of housing complexes. Stack: Frontend with Ionic 3; and Backend with Laravel 7

Project Dev Manager

Paralelo90, 2020 - present

I designed and developed the Paralelo90 multimedia content blog, which is a custom CRM to upload news and audiovisuals, as well as its administration panel. Stack: Blog with Laravel 7, Bootstrap 5 and Livewire; Admin panel frontend with Nuxt.js and Tailwind CSS; and Backend with Laravel 7

Project Dev Manager

MCG CUSTODIOCloud, 2022 - present

I'm designing and developing an application for volumetric controls to generate monthly and daily reports for the National Tax Service regarding hydrocarbons and oil products. Stack: Frontend with Angular 12 and Bootstrap; and Backend with Laravel 8
